building to:

- care for Lake Superior
- *serve community*
- inspire students
- *meet the needs of our future*

Open air classroom, pizza bake kitchen, public event stage, a doorstep to the lake—North House's outdoor space serves many purposes, and we're creating the student commons so the space will better serve you.

We're doing more than simply transforming our old asphalt parking lot into a more picturesque setting. The commons will provide dynamic opportunities for students, create a harbor side gathering place for community events, help us become better stewards to the lake, and make a sweet lunch spot for those just passing through.

Even as the construction is completed in spring 2012, the fundraising effort continues. Securing an additional \$95,000+ of funding is essential. Your investment will move North House forward and provide limitless opportunity for the future. We're building for North House and we're building for community.

The vision is clear, the need is now, PLEASE get involved. Participation of all kinds at any level is welcome. Will you help us with the final push?
